

INZEMAMUL HAQ

Full Stack Engineer | Product Builder | New Delhi, India (Remote)
inzemamhaq05@gmail.com | LinkedIn | GitHub | hargharpq.com

Professional Summary

Full-stack engineer and 2025 CS graduate who ships products end to end — over a year full-time as core engineer on an AI product (WTMF), software internships since 2022, and an independently built, live SaaS (HarGharPG) with UPI payments and 100+ owners. Product-minded and fast: turns rough ideas into working products without waiting for perfect specs, with hands-on experience across financial systems, payments, and consumer apps.

Skills & Tech Stack

Full Stack: React.js, Next.js, Node.js, NestJS, REST APIs, Microservices, Admin Tools & Dashboards

Frontend: Responsive UI, Accessibility, Performance Optimisation, Reusable Components

Backend & Data: Django, PostgreSQL, MongoDB, API Design & Validation, Data Flows

Fintech & Product: Payments (UPI), Financial Systems, Multi-Tenant SaaS, Analytics-Driven Iteration

AI Product: Conversational AI, Real-Time Voice, Model Distillation

Cloud & Languages: AWS (EC2, S3, CloudFront), Docker, CI/CD, Linux | JavaScript, TypeScript, Python

Professional Experience

Knokverse Private Limited | WTMF AI – Full Stack Developer — AI Product

Apr 2025 – Present

- Core engineer behind WTMF — built and own the web platform, mobile app, and DevOps end to end for AI product “**AI Bestie**” (NestJS + Next.js).
- Shipped customer-facing features fast in an Agile team — built RESTful APIs and microservices, real-time voice integrations, and internal tooling.
- Used production issues, analytics, and feedback to improve features post-launch; drove code reviews and root cause analysis.

OnEggy Technologies – Full Stack Developer (Intern)

Sep 2024 – Mar 2025

- Built full-stack client products across React, Next.js, and NestJS — turning rough requirements into working product quickly.
- Designed and optimised REST APIs, improving response time by **70%**; built reusable, accessible UI across devices.
- Worked across SQL and NoSQL databases with Docker-based CI/CD delivery.

Canpe Solutions – Backend Developer (Intern)

Nov 2022 – May 2023

- Built backend services and APIs in Django for scalable **financial systems**; designed data models and improved reliability.

Techroit Solutions – Full Stack Developer (Intern)

Feb 2022 – Oct 2022

- Improved system performance and scalability by **100%**; built cloud-native solutions on AWS and improved frontend responsiveness with React.

Projects

HarGharPG — Fintech-style SaaS – Founder & Full-Stack Builder | hargharpq.com

2024 – Present

- Independently built and operate a live SaaS that automates rent collection, invoicing, and **UPI payments** for PG / co-living operators — end to end, from web flows and dashboards to backend APIs and operational tooling.
- Serves **100+ owners** managing **200+ properties** across 10+ Indian cities; multi-tenant, responsive, multi-language, with Google Drive (KYC) integration.

Leadership

Technical Project Head – Delhi Technical Campus

Nov 2023 – Present

- Led cross-functional teams and hackathons and ran workshops engaging **1500+ students**.

Education

Delhi Technical Campus (GGSIPU), New Delhi – B.Tech — Computer Science and Engineering

2021 – 2025

- CGPA: **7.265/10**
